MULTI-DECKS

THE MOST EFFICIENT COMPLETE SOLUTION WITH PLUG-IN SHELF MODULES.

Meet the newest member of the VENTO family. The VENTO VSV sales-promoting refrigeration island can be placed flexibly in your store's highest-potential locations. Its elegant shelf units provide optimal merchandise visibility and increased customer contact at eye level while presenting your product range perfectly – for a host of different product groups.

INNOVATIVE

Plug, Chill & Sell

No construction work is needed thanks to AHT Plug&Chill technology. Minimal assembly and installation times and extremely low maintenance requirements. The VENTO system effectively prevents any loss of refrigerant through its complete integration of all refrigeration components and reduced overall system complexity.

MULTIFUNCTIONAL

Reposition and Expand

Limitless arrangement options: Furnish new stores according to your plans or spontaneously expand your selling power in existing stores. The VENTO integrated system adapts to your requirements with its row-placeable, plug-in shelf modules and flexible shelf configurations. Another big plus: Optimized space usage thanks to the standard footprint.

ECONOMICAL

Environment-friendly Technology

VENTO FSV protects the environment with its hermetically sealed cooling circuit and low amounts of eco-friendly refrigerant. And coupled with the innovative AHT waste heat usage system, your store's energy balance can be improved even further. After all, what's ecological is always also economical!
